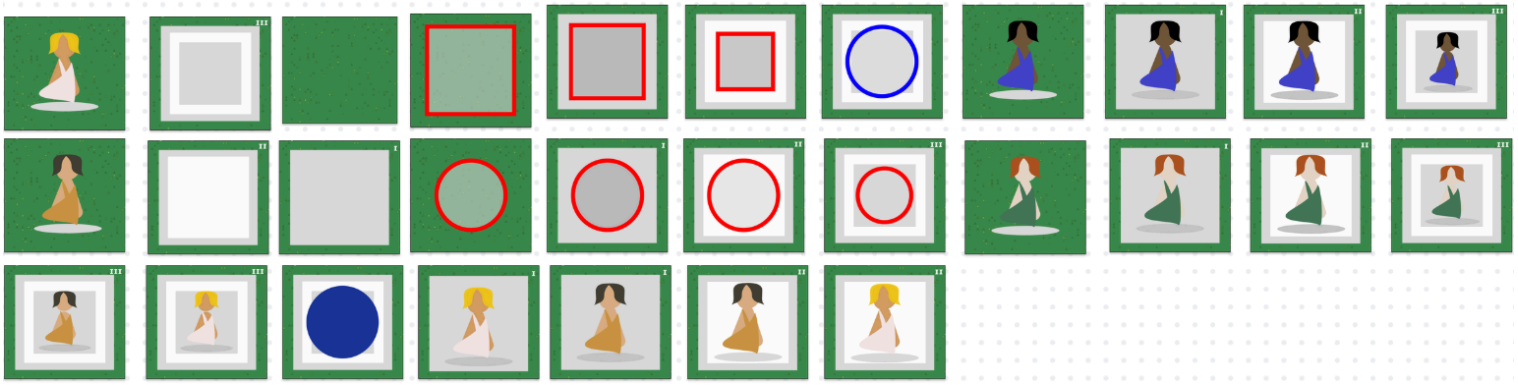
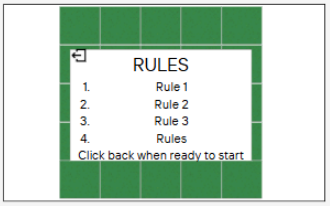
Basic UI Design



Lo-Fi Prototypes

START PAGE

The start page

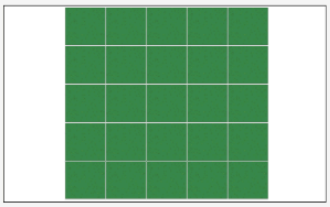


If 'Rules' is clicked

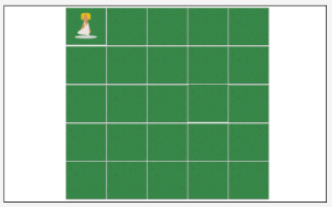
When 'Start' is clicked, God Card options are displayed, Player 1 selects their card, and then Player 2

Players can now either start the game, or go back and restart

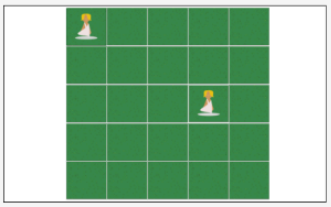
SET UP



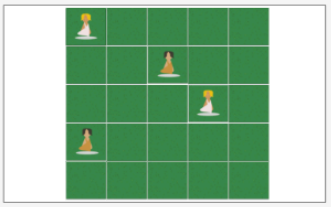
The basic grid



Player 1 places first worker

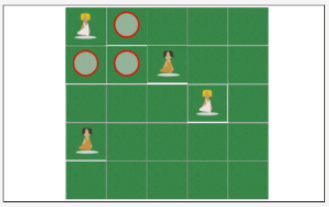


Player 1 places second worker

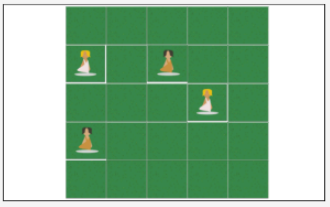


Player 2 places their players

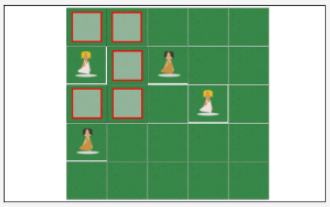
BASIC GAMEPLAY



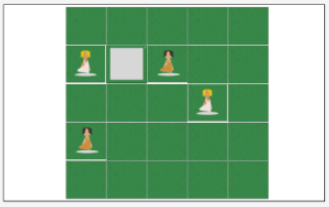
Player 1 looks at their possible moves for their worker in the top left



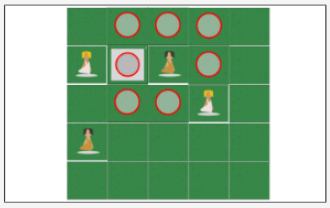
Player 1 moves once downwards



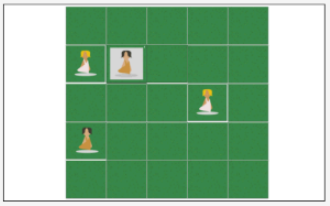
Player 1 looks at their building options



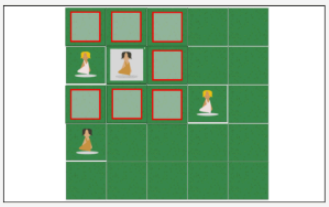
Player 1 builds once to the right



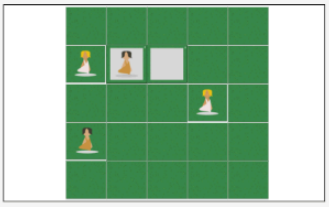
Player 2 looks at their possible moves for their worker next to the Level 1 building



Player 2 moves once to the left

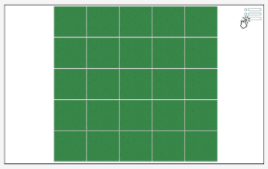


Player 2 looks at their building options

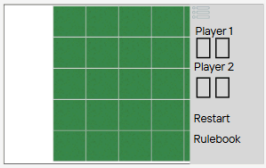


Player 2 builds once to the right

SIDEBAR MENU

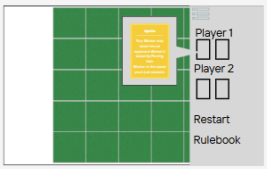


Clickable sidebar menu icon



On click, menu opens

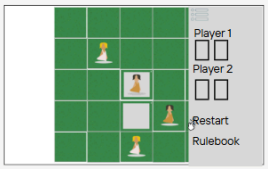
Click to view player's God Cards



Expanded view of player's God Cards

Click to view game rules

Expanded view of Rulebook

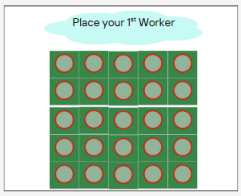


Mid-game - players want to restart game

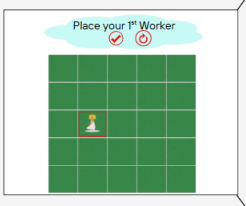
Restart confirmation message

Game resets

TEXT PANEL AND OPTION TO CONFIRM OR RESTART TURN

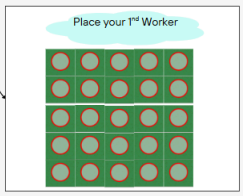


Displays the current turn



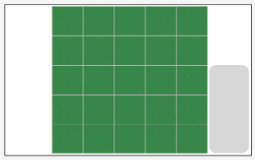
Displays confirm and restart turn buttons

Player selected confirm button (tick). Next turn is displayed.

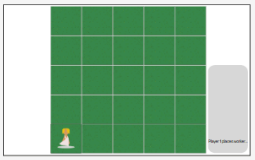


Player selected restart button (arrow loop). Restarted this turn.

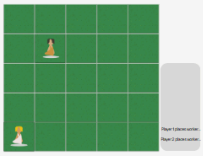
HISTORY LOG



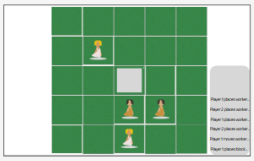
Start of the game



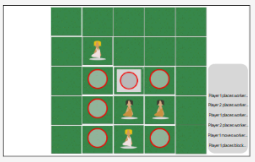
Player 1 places a worker and history log records that action



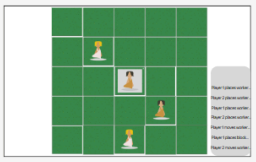
Player 2 places a worker and history log records that action



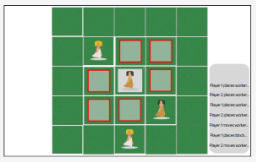
Mid-gameplay. It is player 2's turn



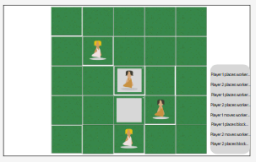
Player 2 is considering possible moves for their left worker



Player 2 moves once upwards and history log records that action



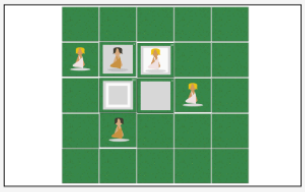
Player 2 is considering possible building options



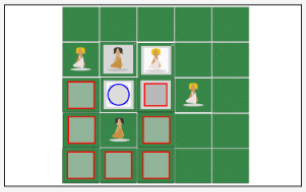
Player 2 builds once downwards and history log records that action

This process then repeats as workers ascend and build higher to reach the win condition, or win by default. Some examples of possible gameplay:

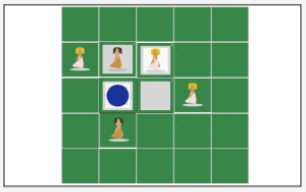
DOME CONSTRUCTION



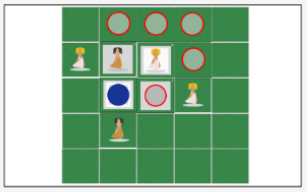
The gameplay has continued, it is now Player 2's turn to build. Player 2 must block Player 1 from ascending to Level 3 to win the game



The gameplay has continued, it is now Player 2's turn to build. Player 2 must block Player 1 from ascending to Level 3 to win the game

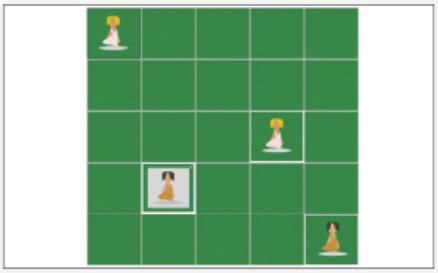


Player 2 builds a dome on the Level 3 Cell

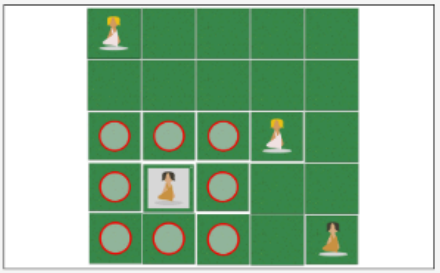


Player 1 is not able to ascend to the Level 3 Floor

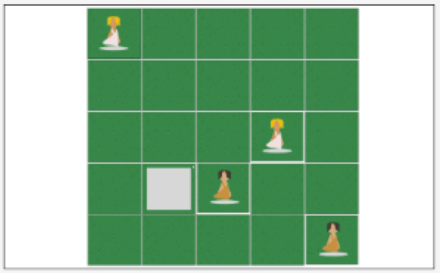
DESCENDING



Player 1's worker is currently standing on a level 1 block.

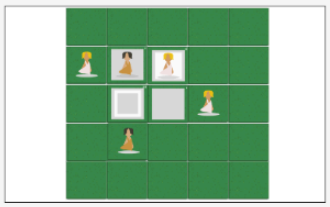


Considering possible moves.

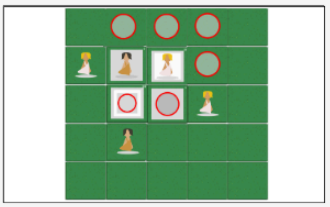


Player 1 moves their worker down 1 level.

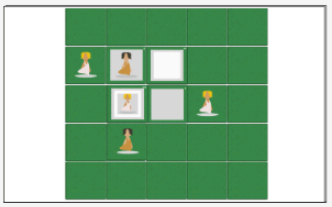
ASCENDING TO LEVEL 3 TO WIN



The gameplay has continued, it is now Player 1's turn to move. Player 1 is currently on level 2 and must ascend to level 3 to win.



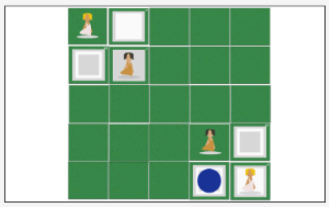
Player 1 looks at their possible moves



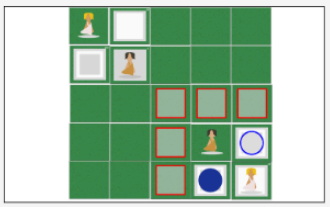
Player 1 moves to level 3 and wins the game

Players are notified that Player 1 won the game!

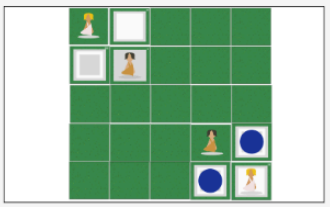
TRAPPING YOUR OPPONENT'S WORKERS TO WIN



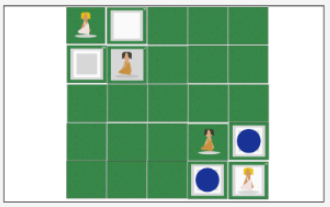
1 of Player 1's workers is trapped (top left corner), so Player 1 only has 1 moveable worker (bottom right corner).



It is Player 2's turn to build. Player 2 looks at their building options.



Player 2 builds a dome on the Level 3 Cell, trapping Player 2's worker.

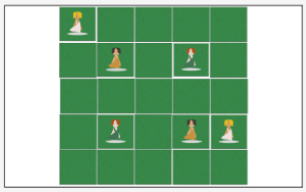


Neither of Player 1's workers are moveable, therefore Player 2 wins by default.

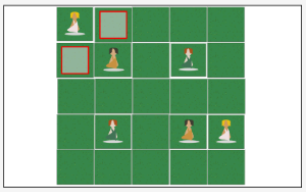
Players are notified that Player 2 won!

There are also a number of possible extensions available for the board:

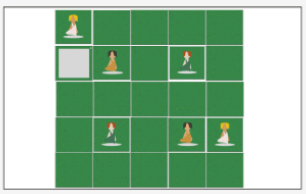
3 PLAYER GAMEPLAY (EXTENSION)



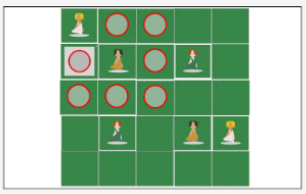
There are 3 Players, each has 2 workers.



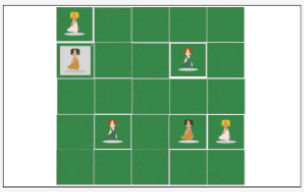
It is Player 1's turn to build. Player 1 looks at their building options.



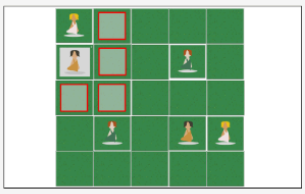
Player 1 builds once downwards.



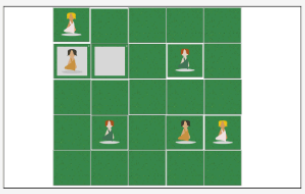
It is Player 2's turn to move. Player 2 looks at their moving options.



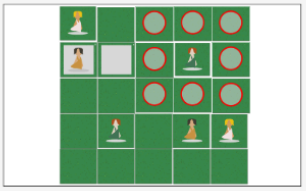
Player 2 moves once left.



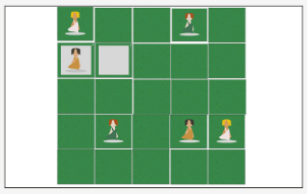
Player 2 looks at their building options.



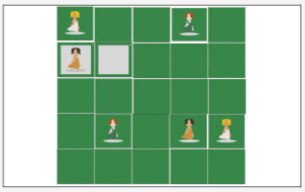
Player 2 builds once right.



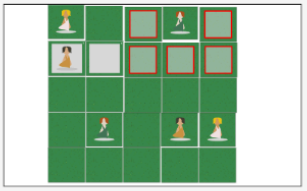
It is Player 3's turn to move. Player 3 looks at their moving options.



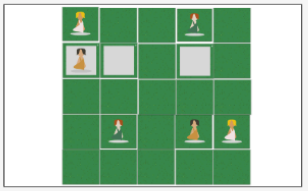
Player 3 moves once upwards.



Player 3 moves once upwards.

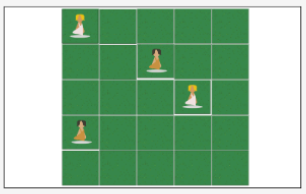


Player 3 looks at their building options.

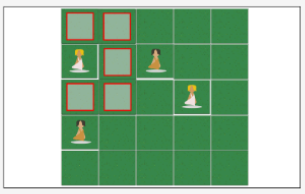


Player 3 builds once downwards. Next, it will be Player 1's turn to move (turn cycle repeats).

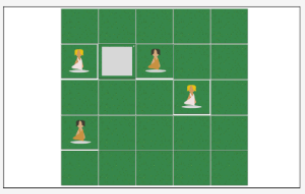
4 PLAYER GAMEPLAY (EXTENSION)



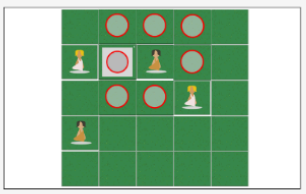
There are 4 Players, Player 1 and 3 are a team and share 2 workers, Player 2 and 4 are a team and share 2 workers.



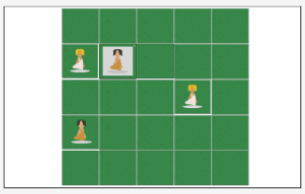
It is Player 1's turn to build. Player 1 looks at their building options



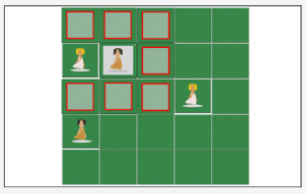
Player 1 builds once to the right



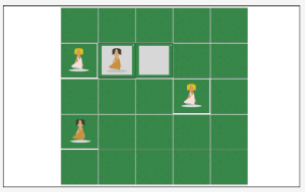
It is Player 2's turn to move. Player 2 looks at their moving options.



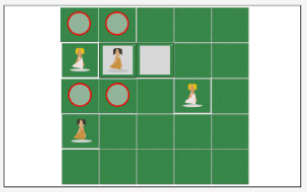
Player 2 moves once to the left



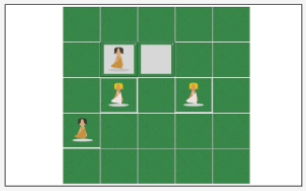
Player 2 looks at their building options



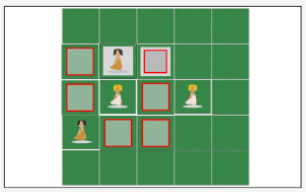
Player 2 builds once to the right



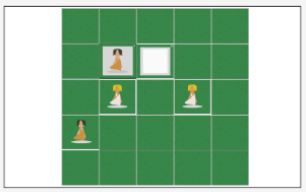
It is Player 3's turn to move. Player 3 looks at their moving options.



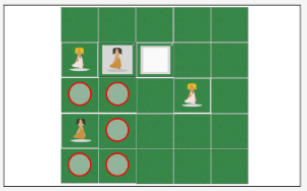
Player 3 moves once to the right



Player 3 looks at their building options.

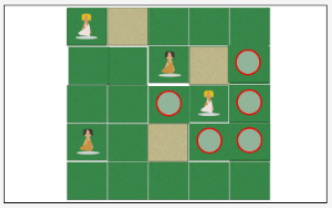


Player 3 builds once to the top-right

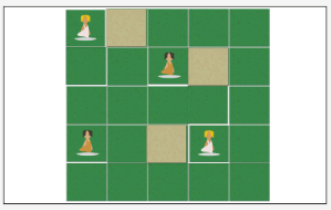


It is Player 4's turn to move then build. Next, it will be Player 1's turn (turn cycle repeats).

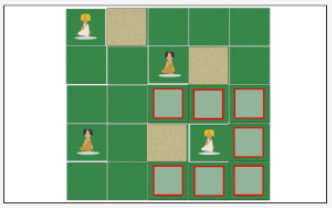
HOLES IN THE BOARD (EXTENSION)



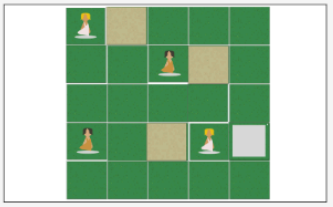
Player 1 looks at their possible moves for their worker in the mid right, where they are not able to move into holes on the board



Player 1 moves once downwards



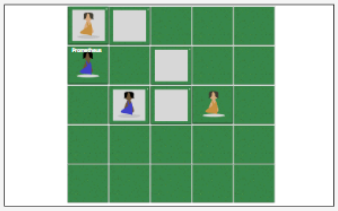
Player 1 looks at their building options, where they cannot build on the holes.



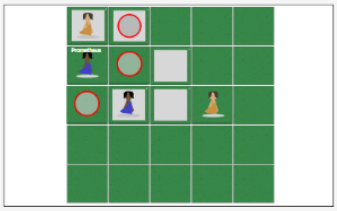
Player 1 builds once to the right

As well as God Cards:

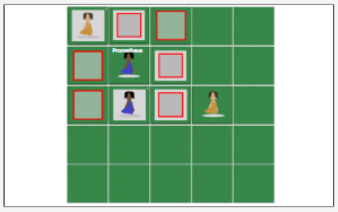
PROMETHEUS GOD CARD(EXTENSION)



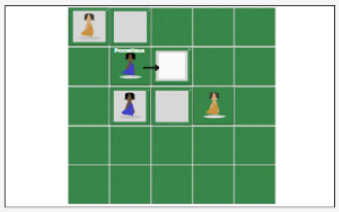
Mid-gameplay. It is player 1's turn and they want to move their worker Promethus.



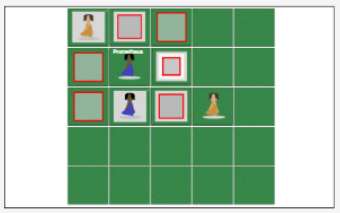
Looking at possible moves, player 1 chooses not to move up to the level 1 space



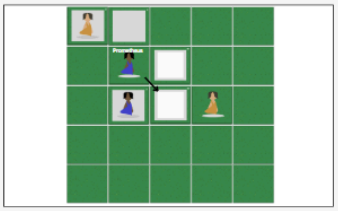
Player 1 moves Prometheus to the right and now considers building options.



Player 1 builds once.

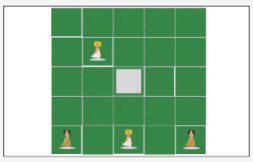


Player 1 looks at possible building options for a second time.

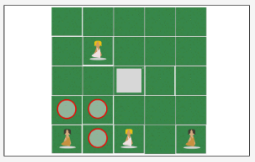


Player 1 builds a second time.

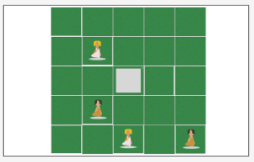
HERMES GOD CARD(EXTENSION)



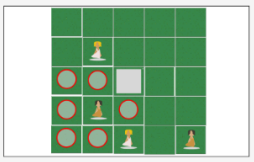
Mid-gameplay. It is player 2's turn and they have the Hermes God Card.



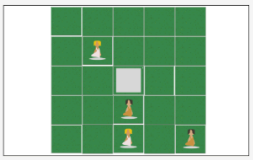
Player 2 is considering possible moves for their left worker



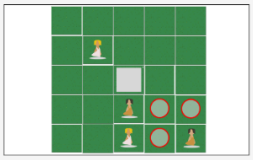
Player 2 moves once diagonally north-east



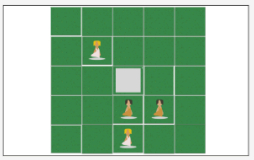
Player 2 is considering possible moves for their left worker again (as they can move their workers any number of times if the workers do not move up)



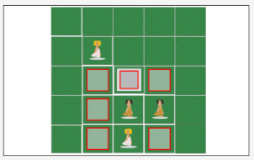
Player 2 moves once right



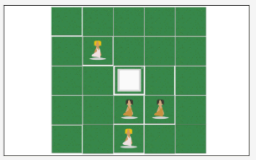
Player 2 is considering possible moves for their right worker



Player 2 moves once diagonally north-west



Player 2 ends their movement and is considering possible building options



Player 2 builds once upwards making a level 2 bulding
